Jung Lee

M.S. Student, Seoul National University Human-Centered Computing Lab (HCCL)

leejungp2@snu.ac.kr • +82 10-8800-3243

Research Interests

My research examines how people build and revise mental models of AI systems as collaborators, as relational partners, and as tools in the workplace. I design and empirically evaluate LLM-based interactive systems to understand how interaction design shapes these models, and how such systems can augment people at work and support their well-being.

Education

- **Seoul National University** Seoul, Republic of Korea

  M.S. in Intelligence and Information *March 2025 – Present*
  - Advisor: Prof. Bongwon Suh
  - Coursework: Statistical Analysis for Information Studies; Math and Statistics Foundations for Data Science; Conversational AI; Computing Foundations for Data Science; AI-assisted Frontend Development

  B.A. in Psychology, double major in Information Science and Culture *March 2018 – February 2024*
  - Thesis: The Effect of Writing a Gratitude Diary Through a Chatbot Interface on Positive Affect
  - Coursework: Psychological Statistics; Programming Usable Interfaces; Introduction to Information-Culture Technology; Introduction to Virtual Reality

Research in Progress

- Minchae Kim*, **Jung Lee***, Minjeong Shin, Kyusik Kim, and Bongwon Suh. **InterAICion: Multi-turn Simulation Framework for Relational Harm in AI Companions.** *Under review at the Annual Conference of the Nations of the Americas Chapter of the Association for Computational Linguistics (NAACL '27).*
- **Jung Lee***, Junghwan Kim*, Junyoung Jeon, and Bongwon Suh. **Patchwork: Making Document Synthesis Visible and Reusable in Generative Knowledge Work.** *Under review at the ACM Conference on Human Factors in Computing Systems (CHI '27).*

Publications

- Junghwan Kim, Hyeonseok Jeon, **Jung Lee**, Dongseok Heo, and Bongwon Suh. **CaseSense: Mapping the Legal Case Landscape with Multi-Dimensional Visual Exploration.** *Proceedings of the 39th Annual ACM Symposium on User Interface Software and Technology (UIST '26).* [link]
- Junghwan Kim*, Dongseok Heo*, Kyusik Kim, **Jung Lee**, and Bongwon Suh. **Co-Overcooked: Cognitive Constraints on Partner Modeling in Human-AI Team Composition.** *Proceedings of the 48th Annual Meeting of the Cognitive Science Society (CogSci '26).* **Oral Presentation (top 9.3%).** [link]
- **Jung Lee**, Jaehoon Choi, Hyungwoo Song, Minjeong Shin, and Bongwon Suh. **"What Can I Control?": Designing an Attribution Reframing Chatbot for Early-Career Employees' Workplace Stress Management.** *Extended Abstracts of the 2026 CHI Conference on Human Factors in Computing Systems (CHI EA '26).* [link]
- Minchae Kim, Hyungwoo Song, **Jung Lee**, and Bongwon Suh. **"Just Listening Was Enough—Until It Wasn't": Relationship-Stage-Aware Cognitive Scaffolding in AI Companions.** *Extended Abstracts of the 2026 CHI Conference on Human Factors in Computing Systems (CHI EA '26).* [link]
- **Jung Lee**, Jaehoon Choi, Minjeong Shin, Hyungwoo Song, and Bongwon Suh. **Designing an Attribution Retraining-Based LLM Chatbot for Workplace Stress Management Among Early-Career Employees.** *Proceedings of HCI Korea 2026*, pp. 667–673. [link]

** Equal contribution.*

Research Experience

- **Graduate Researcher, SNU Human-Centered Computing Lab** — Seoul, Republic of Korea
  Advisor: Prof. Bongwon Suh — *March 2025 – Present*
  - Studied how users' models of an AI partner shift across interaction, spanning team collaboration, companion relationships, and expert tools
- **Lead Researcher, SNU Research Grant for the Social Sciences** — Seoul, Republic of Korea
  Advisor: Prof. Sowon Hahn — *October 2023 – December 2023*
  - Designed and ran a between-subjects study with 87 participants as sole investigator, examining the effect of writing a gratitude diary through a chatbot interface on positive emotions
  - Built 'diaryBot', a chatbot that helps users write a gratitude diary, using the ChatGPT API
- **Lead Researcher, SNU Undergraduate Research Opportunity Program** — Seoul, Republic of Korea
  Advisor: Prof. Sowon Hahn; Mentor: Dr. Yoon Kyung Lee — *May 2021 – January 2022*
  - Led a two-person team in a between-subjects study with 94 participants, investigating whether emotion-based or situation-based music recommendation better alleviates negative affect
  - Built 'Music-bot', a music recommendation chatbot based on a preprocessed Kaggle dataset using Python
- **Research Intern, SNU Human Factors Psychology Lab** — Seoul, Republic of Korea
  Advisor: Prof. Sowon Hahn — *March 2021 – January 2022*
  - Participated in data validation and sentiment classification for emotion diary research
  - Analyzed emotion words from social media through word2vec and topic modeling in Python workshops

Honors and Awards

- **Research Grant for the Social Sciences**, Seoul National University — *2023*
- **Undergraduate Research Opportunity Program**, Seoul National University — *2021*

Teaching

- **Teaching Assistant, AI Transformation (AX) Accelerating Program** — Asan, Republic of Korea
  Asan City Local Creator Support Program — *Aug 2026 – Sep 2026*
  - Ran hands-on practicum sessions helping local founders apply AI tools to their own products and operations

Work Experience

- **Research Assistant, Doosan CVC (Korean Industrial Conglomerate)** — Seoul, Republic of Korea
  Startup and market research for early-stage investment review — *September 2022 – December 2022*
  - Investigated AI, drone, biotech, and green-tech market prospects and sized startups under investment review

- **Strategic Planning Intern, Allprep (Edutech Startup)** Seoul, Republic of Korea
  Business model and marketing planning for online test-prep services *July 2021 – September 2021*
  - Planned a new business model for online TOEIC and TOEFL education services
  - Analyzed industry trends and competitors to develop marketing strategies
- **Content Planning Intern, Fit-account (Mental Healthcare Startup)** Busan, Republic of Korea
  Translating personality and consumption data into in-app well-being content *July 2021 – August 2021*
  - Created solution content for the mobile application 'Fit-account'
  - Organized happiness solutions based on Big Five personality traits and consumption-type data

Project Experience

- **Sole Developer, Pie Company (AI Content Service)** Seoul, Republic of Korea
  End-to-end product work *November 2025 – August 2026*
  - Planned, built, and marketed an AI fortune-telling service, reaching 500+ monthly active users within two months
- **Product Manager, Mapsee (App Store Application)** Seoul, Republic of Korea
  Location-based diary app built at Happetite (SNU App Development Club) *February 2022 – August 2023*
  - Led a five-person team of designers, developers, and planners to launch 'mapsee', a location-based diary application, on the App Store
  - Conducted user interviews and usability tests, created wireframes, and built the MVP

Service and Leadership

- **Student Volunteer**, ACM Symposium on User Interface Software and Technology (UIST 2025) *2025*
- **Member**, SNU Venture Startup Network (SNUSV) *2024 – 2025*
- **Consultant**, SNU Social Contribution Consulting Society (T-um) *2020*
- **Member**, SNU Student Society for Social Responsibility (SNUSR) *2018 – 2019*

Skills

- **Programming**: Python, TypeScript, JavaScript, Swift, R, C
- **ML & NLP**: PyTorch, Hugging Face Transformers, LangChain, LangGraph
- **Tools**: Claude Code, Codex, Unity, Figma, Logic Pro, Final Cut Pro
- **Languages**: Korean (native), English (fluent), French (intermediate)
